

Smart Rx Fill

Smart Rx Fill Solution Powered by Smart ID Works and QS/1™ NRx™.

Add additional revenue to your office by filling patient prescriptions in your practice. Patients will appreciate the efficiency and convenience of being able to have their prescriptions in hand before they leave your office.

The Smart Rx Fill solution utilizes QS/1™ NRx™ to bring the pharmacy in-house without the administrative overhead. Our solution lets you effortlessly fill prescriptions and electronically adjudicate claims. Drug information, labels, and co-pays are printed at your location, while the hosted pharmacy software bills insurers and sends payment to your practice. Smart Rx Fill automatically checks insurance compliance, processes refills, and provides patient prescription history. Best of all, your practice captures the revenue that was previously sent out of your practice.

The benefits of Smart Rx Fill are:

- QS/1™ NRx™ system is user friendly.
- the solution requires only a small footprint in your office.
- Smart ID Works will help your office get up and running with 3rd party payors.
- Smart ID Works will help your office get a NPDS number from the NCPDP.
- in-house online training is provided for the software.
- an exclusive help desk for Smart ID Works customers.
- data analysis of potential revenue can be provided.
