

# Smart Rx Order

## Smart Rx Order is a Medicare Qualified e-Prescribing system with over 1,000 registered Oncologists.

Earn your e-Prescribing incentive from Medicare and provide your patients with the most comprehensive care possible with Smart Rx Order. Prescriptions can be written from a computer, tablet, notebook, or other device which reduces error and also creates a documented record of patient medications. This tool for medication management provides greater efficiency for all involved, from the physician's office, to the pharmacy, and ultimately to the patient.

Visit <http://www.oncologyrx.com> to sign up today for Smart Rx Order for Oncologists.

## The benefits of Smart Rx Order are many, including:

- send prescription electronically to the pharmacy.
- automated patient prescription insurance eligibility checking.
- access to plan-specific formularies.
- save money by receiving refill renewal requests electronically from the pharmacy
- print drug education information to leave with patient.
- a documented medication history based on what was prescribed.
- drug and allergy interaction checking.
- saving time in documentation, transmission, filing, and numerous phone conversations regarding lost, illegible, non-formulary compliant, prescriptions with the pharmacy.
- reduced pharmacy call-backs for medication refills, and automatic renewal while checking compliance with the patient's insurance formulary.
- increased patient safety with a 5-step automatic drug utilization review at the point-of-care, which includes: monitoring drug interactions, prior adverse reactions, dosage, duplicate therapy and drug-to-health state verification.
- increased formulary compliance by providing up-to-date formulary alternatives.
- increased prescription accuracy by eliminating errors due to handwriting legibility.
- a faster prescription process by utilizing electronic transmission of legible prescriptions via SureScripts™, RxHUB, or fax.
- reduced chart expenses by eliminating chart pulls as well as reducing turnaround time for renewal requests by automatically processing prescription refills.
- offering patient prescription history communication with pharmacies and pharmacy benefit managers (PBMs).
